Research Integrity and the Responsible Conduct of Research - Checklist for Research Students and their Mentors at the University of California, Riverside*

Introduction

This checklist, structured in relation to different aspects of research integrity, is designed to assist mentors and students to engage in a broader dialogue about research integrity and the responsible conduct of research.

In working through this list, mentors and trainees can discuss:

- What research integrity means to them, to the University, to researchers and the community
- What the University requires of its staff and students
- Relevant ‘subject’ or ‘discipline’-specific codes
- Project-specific requirements (eg. human subjects approvals, animal subjects approvals, laboratory notebooks, overseas-based research etc.)

It is recommended that supervisors and their students use this checklist at the start of a student’s research, discuss it periodically throughout the student’s career and review it at least annually.

* Checklist adapted from University of Oxford, with generous permission.

| Introduction to the responsible conduct of research | At the start of the research, provide student with information about University and other resources available. | UCR’s Institutional Plan for RCR training:  
https://research.ucr.edu/media/31934/rcr-institutionalplan.pdf  

On Being A Scientist: an introduction to the responsible conduct of research from the National Academy of Sciences.  

NIH RCR policy regarding training in the responsible conduct of research:  

NSF RCR policy regarding training in the responsible conduct of research:  

NIFA/USDA RCR policy regarding training in the responsible conduct of research:  
https://nifa.usda.gov/responsible-and-ethical-conduct-research  

CITI online – an online course, used by UCR, designed to give an introduction to good practice in research. | |
| **Subject-specific and local policies/guidelines** | Discuss any relevant discipline-specific, funder-specific (i.e., NIH or NSF) or professional codes of conduct, particularly as they work in practice. Provide student with any external funding terms and conditions. Provide student with any faculty, departmental or divisional policy documents relating to the conduct of his/her research. |   |
| **Authorship** | Discuss, in general, requirements for a person to be listed as an author of a publication. Discuss what the publication strategy will be for the student’s project, including criteria for authorship. Discuss authorship throughout the project, especially prior to work being prepared or submitted for publication. Agree on authorship and attribution for each publication. | DHHS Office of Research Integrity - [http://ori.hhs.gov/preempting-discord-prenuptial-agreements-scientists](http://ori.hhs.gov/preempting-discord-prenuptial-agreements-scientists) International Committee of Medical Journal Editors: [http://www.icmje.org/recommendations/browse/roles-and-responsibilities/defining-the-role-of-authors-and-contributors.html](http://www.icmje.org/recommendations/browse/roles-and-responsibilities/defining-the-role-of-authors-and-contributors.html) Contributor Role Taxonomy [https://docs.google.com/document/d/1aJxrQXYHW5U6By3KEAHrx1ho6ioeh3ohNsRMwsoGPM/edit](https://docs.google.com/document/d/1aJxrQXYHW5U6By3KEAHrx1ho6ioeh3ohNsRMwsoGPM/edit) |
| Conflict of interest | Discuss with the student the concept of ‘conflict of interest’ in research.  
Provide student with copy of federal and University policy and discuss how any potential conflicts associated with their research might be declared and managed. | Public Health Service (PHS) Financial Conflict of Interest Policy  
UCR Policy on Conflict of Interest  
https://research.ucr.edu/ORI/committees/pro.aspx |
|----------------------|---------------------------------------------------------------------------------|---------------------------------------------------------------------------------|
| Regulatory Requirements | If the student’s research will use animals, discuss the University’s procedures for ethical review.  
If the student’s research involves human participants or personal data or materials, discuss the University’s procedures for ethical review. | https://research.ucr.edu/ORI.aspx |
| Licences and permissions | Discuss whether any licences and permissions are required before the research project commences (including any relevant training which might be necessary):
- Import licences for materials
- Licences to use certain materials
- Agreements necessary to use materials, for example through a material transfer agreement (MTA)
- Permissions from communities or government agencies

NB. This should include projects involving fieldwork overseas. | UCR policies for:
Export control: https://research.ucr.edu/spa/export-controls.aspx
Materials Transfer Agreement: https://research.ucr.edu/otc/material-transfer-agreement.aspx
Office of Technology Commercialization: https://research.ucr.edu/OTC.aspx |
| Research data and records management | Discuss how research data and records generated will be collected, stored, and managed. Consider the following general areas:  
- Where these will be stored and how they will be identified  
- How to keep data and records secure and protected from damage/destruction  
- Accessibility  
- Confidentiality/privacy issues  
- Archival/long-term value. Other areas may specifically apply:  
- If the research is externally-funded, are there terms and conditions relating to how data is collected and stored?  
- Laboratory notebooks  
- Research involving human participants (incl. consent forms, questionnaires). | https://dmp.cdlib.org/
